

nanoStream

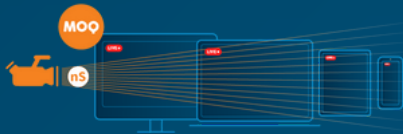

REAL TIME VIDEO

THAT
SIMPLY
WORKS

nanostream is the global platform to stream instantly in real-time.

Stream faster, smarter and more reliably, while engaging your audience and maximizing revenue.

STREAMING

Seamlessly deliver real-time streams worldwide with our MOQ CDN.

Built for 24/7 reliability, with live transcoding, API integration, and advanced security.

PLAYBACK

Playback in real-time on any device or browser, even on poor networks.

Ensure instant engagement with fast video startup, adaptive bitrate, and configurable latency control.

ANALYTICS

Gain complete visibility and actionable insights.

Monitor usage, traffic, and viewer demo-graphics, set custom alerts for proactive issue management and protect your streams with powerful data.

LIVE REPLAY TOOLS

Instant replays, real-time highlight clips, motion previews, and VOD recording.

Keep your audience engaged live and on demand.

LIVE CAPTIONS

Boost accessibility and engagement with real-time AI captions.

STREAM FAST STREAM CONFIDENT

Reach your global audience with real-time video that's fast, reliable, and fully under your brand.
